CASE STUDY: Pharmaceutical Research Company

ABOUT

A large global pharmaceutical company struggles with IT Services and Cost Management control after several large corporate acquisitions. The company described its environment as "a complete disaster" because they lacked the internal staffing resources to manage its telecom and IT spend. The company acknowledged that it needed clarity around its IT and telecom environments.

REQUIREMENTS

Before
130+
invoices with
multiple providers

After
100%
invoices
consolidation

SOLUTION

With the Warner Telecomm IT services and cost control management solution the company was able to automate, optimize, and consolidate the invoices using Warner Telecomm business intelligence tools to visualize the data in its cloud based portal.

RESULTS

Warner Telecomm was able to decrease the telecom spend by almost 35% using our business intelligence tools to solve challenges and visualize the company's network requirements.

Savings that pay for our services. Guaranteed.

We're so confident that our approach reduces your telecommunications expenses that it comes with a 150% money back guarantee.
